YKCC
PRACTICAL AI TRAINING

2-DAY HANDS-ON WORKSHOP · HRD CORP

AI Agents for Business 101

Building AI agents as digital colleagues for business productivity.

It does the work, not just the talking.

Most people have only ever used AI as a chat window that gives advice. Over two days you will set one up to actually open your files, build the report, and save it into your folder — finished work, not suggestions you still have to type up yourself.

CONFIGURE AN AI AGENT TO:

- **Analyse your financial reports** and explain them to you in plain English, Chinese or Bahasa Malaysia
- **Estimate your CP204 tax:** forecast the full year from your accounts to date and work out the tax payable
- **Put HR on evidence:** score a 16-factor personality questionnaire for job candidates, and write a staff performance review from your own sales and collection figures
- **Prepare presentations** for board meetings and client pitches
- **Draft letters, quotations, contracts and agreements** automatically, in your own format
- **Turn photos and PDFs** of invoices and receipts into Excel listings and expense claim forms
- **Build your second brain:** teach your AI agent what you know about your clients, HR, products and projects

YOU GO HOME WITH

- An AI colleague set up and working on your own laptop
- Every file you build during the two days, yours to keep
- A step-by-step handbook so you can do it all again at your desk
