How the two days run: find the pain, then build

1. **Meet the AI agent** — Watch it do real work
2. **Strategy & pain points** — Rank by impact × ease
3. **Break down a process** — AI does it, a human checks
4. **Set up your Claude** — Email, calendar, browser
5. **14+ use cases** — Shown live, then you do it
6. **Build your project** — Take it back to the office
